

Adjustable Tilt Angle Solar Mounting System

Series Name : AD-I

Technical Data

- Solar system: PV plant, PV park, open area ground PV system
- System type: ground screw or concrete foundation
- Material Option: hot-dip galvanized steel, Aluminum ,Stainless Steel
- Max snow load: 0.8 kn/㎡
- Max wind load: 32 m/s
- Mounting angle: customized design; fixed
- Module: framed crystalline module, unframed thin film module
- Module connection: no clamp required, module fixed directly on structure
- Average thickness of zinc layer: up to 80 um or customized

Features

- Adjustable tilt angle from 25-40°
- Maximize module power generation
- Fit to breeze, large direct sunshine angle change area
- High robust, stable & durable
- Base: screw or concrete foundation
- Module array vertically & horizontally
- 10 years durability warranty
- 25 years anti corrosion warranty
