

Tile Rooftop Solar Mounting System

Series Name : TR-I

Technical Data

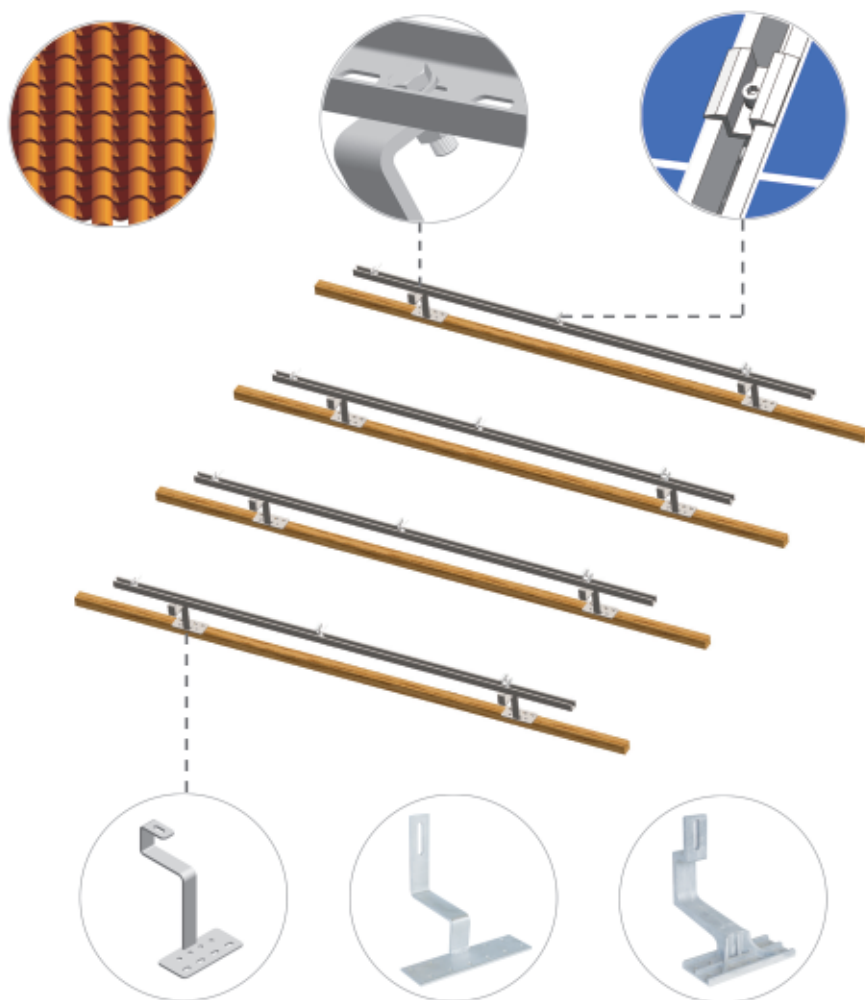

- Solar system: Tile rooftop solar system
- Roof type: individual, private house rooftop
- Material: hot-dip galvanized steel & Aluminum alloy & stainless steel
- Max snow load: 0.8 kn/㎡
- Max wind load: 32 m/s
- Mounting angle: same as roof tilt
- Mounting angle: customized design; fixed
- Module: framed crystalline module, unframed thin film module
- Module connection: middle & end clamp

Features

- Ingenious hook design to connect house beam & solar modules
- Aesthetics & protective design to the house
- No destroy to the roof & keep roof water proof
- Material saving & Cost efficient
- Quick & easy mounting
- 10 years durability warranty
- 25 years anti corrosion warranty
